

Kidney Medicare Drugs Awareness and Education Initiative

PHASE 1: Awareness STORY BOARD

"Medicare is changing in 2006."
"How so?"
"Well, it may pay for the prescription drugs we take now and may need to take in the future."

"Everyone will be able to choose a plan that meets their needs. We're going to have to think about this and learn more to help us decide."

"If you have limited income, you may be able to get extra help."

"I'm glad you came to see me"

Ask your social worker for more information and bring any government mail you've received so that they can explain the changes.
